# MCD85

The new open-chassis MCD85 SACD/CD Player from McIntosh has been painstakingly hand-built for both CD/SACD and contemporary music-listening. In addition to CD/SACD playback, the MCD85 benefits from a USB input which supports high-resolution audio (up to DSD256 and DXD 384 kHz). The device's advanced internal DAC enables playback from smart devices, computers and USB-equipped devices, all with the legendary McIntosh sound quality.

- Immerse yourself in your music with the MCD85 SACD/CD Player. The MCD85, with its open chassis design, is not only a serious piece of music hardware, but it shows that you are serious about your love of music.
- With the success of McIntosh's retro-styled products, it's clear that many people want their home stereo system not to blend in but instead to be distinctive looking. You'll want to put the MCD85 on display because its a conversation starter and a statement.
- Plays shop-bought SACDs and CDs as well as music from homemade CD or DVD Data Discs. Compatible with numerous file formats.
- USB Audio input supports up to DSD256 and DXD384kHz, and can be used to stream digital music from a computer or digital storage device.
- Features quad balanced, 8-channel, 32-bit/192kHz Digital-to-Analog Converter (DAC). Four DAC channels are dedicated to each audio channel to ensure truly exceptional stereo sound reproduction.
- Balanced and unbalanced fixed analog stereo outputs.
- Disc handling is smooth and quiet thanks to an advanced disc transport with a precision die-cast aluminium tray.
- 2x read speed allows disc data to be stored in a buffer memory for a better error correction and tracking.
- Power Control and data ports allow for seamless integration with other McIntosh home audio system components.

**Type**

SACD/CD Player

**Disc Formats**

SACD, CD, CD-R/RW and DVD-R; popular file formats such as AAC, AIFF, ALAC, DSD (up to DSD128), FLAC, MP3, WAV and WMA
